Date	Time	Notes	Initials
10/28/16	1:00pm	<p>Oct 28, 2016; Rabbit 30 (Baby Girl), has had some continued, gradual weight loss. However she is still eating well and acting normally. Due to her age, I am suspicious that she may have uterine cancer. But I haven't found a mass yet. I've got arrangements to get bloodwork sent out to the lab. Probably will get a sample the second or third week of Nov if that is ok. Plan to monitor for now.</p> <p>Sept 28, 2016 email; Baby Girl, Rabbit 30, is at the lower end of her weight range. [REDACTED] noted that she has been eating well and acting normally for her. [REDACTED] and I examined her today. She is a bright, social and active rabbit. I didn't find any obvious issues on exam, but did not check her teeth. We are increasing hay so that should help with tooth issues, unless she has a tooth root abscess. We can't assess her teeth without radiographs.</p> <p>We will keep an eye on her, and her weight. I would like to pull blood for CBC/Chem as well, sometime during the next few weeks.</p>	LJ
11-2-16	10:00a	Alert + Active. Weight is down. Noted hair loss thoracic region. Skin OK. Noted rabbit eating hay. CTM.	[REDACTED]
11-9-16	1:15p	BARH. Rabbit lost more weight. No findings on physical exam. Plan to do WPRV source.	[REDACTED]

Rev 10-22-09

DMK

BAR = Bright, Alert, Responsive

TAO = Topical Antibiotic Ointment

SID = Once daily; BID = Twice daily; TID = Three times daily

CTM = Continue monitoring
